

A Special Day for Students of Northlight School

For most students, 19 November 2011 is just but another Saturday. However, for the students of Northlight School, this Saturday is extraordinary.

Jointly organised by STAR Automotive, SGMerc Club and BMW-SG Club, 25 students who are studying Engineering Service were treated to an excursion to understand how a modern workshop in Singapore operates.

As early as 9:00am, all Club members have gathered at Northlight School and chauffeured the students with their luxurious German cars to STAR Automotive Centre in 249 Jalan Boon Lay. During their tour in STAR, the students were introduced to the latest technological equipments used to diagnose German cars, precision tools for restoring back cars damaged during a collision and the robust production flow. The students have benefited from this excursion and many of them looked forward to pursue their education in automotive repairs.

At Northlight School – Members and students getting ready to set off.

Students enjoying their ride in members' cars.

Convoy reaches STAR Automotive, Jalan Boon Lay centre

Students and club members treated for the tour.

The tour ends with a group photo
